## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Morgan et al. (Morgan), U.S. Patent No. 5,799,286, or Castelaz, European Patent No. 0 362 874.

Morgan and Castelaz teach systems, methods, and databases for determining the total cost from various costs added together for business activities.

Neither Morgan nor Castelaz explicitly disclose implementing a selected accounting method for actual cost collection and a selected accounting costing method for actual cost presentation based upon the stored cost source identifiers, the selected accounting costing method for actual cost collection being independent of the selected accounting costing method for cost presentation.

Official notice is taken that it is well known to use independent routines for data capture and processing and data presentation and, to provide compartmentalized coding, would have been obvious to do.
